

Start Interface

Open "GoNow" Application

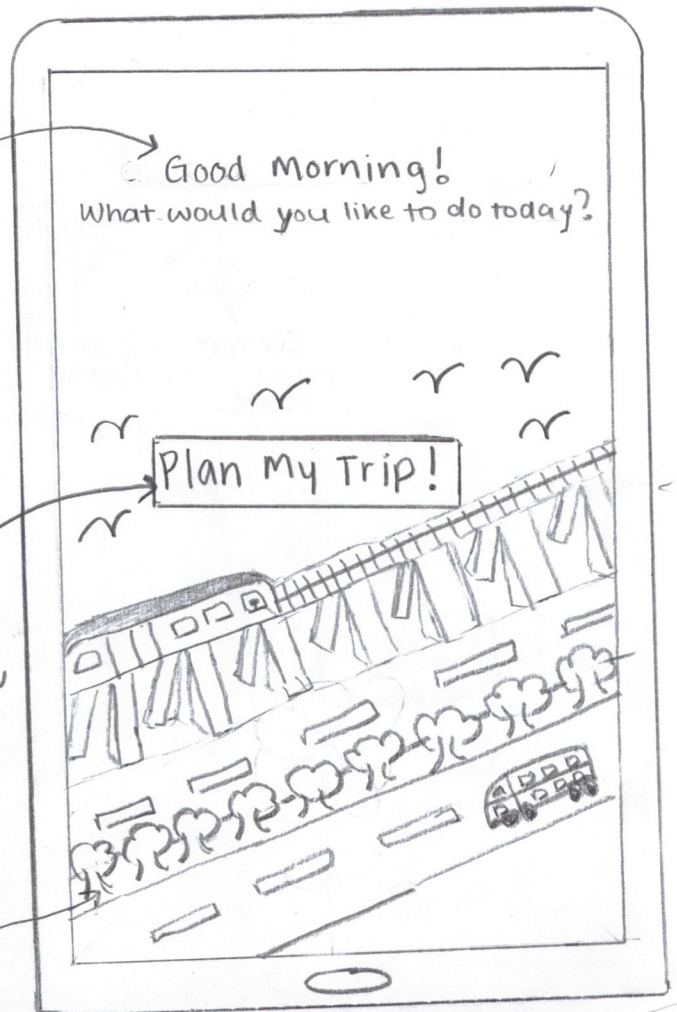

The icon "GoNow" shows up on the screen.

→ Attractive fonts and colors to attract the user.

→ An Android Application

② Plan Your Trip

changes between "Good Morning" and "Good Afternoon" depending on time of day. ← friendly system greeting

1) User has the option of either giving a real time enquiry to plan a trip or preplanning a trip for a later time depending on arrival/departure time.

↑ will see this in later pages

Upon clicking this button the screen changes to the next screen as shown in page 2

← attractive design to greet the user

clean and concise format

3a User chooses "Plan my Trip"

→ concise title

☐ unchecked
☒ checked

→ a checkbox: an efficient system feedback that informs the user that his/her option has been recorded by the system.

→ informative help that explains the menu if user is in doubt

→ an arrow to inform the user to go on to the next menu.

simple menu part that even first-time users can use.

→ caters to universal usability and all kinds of users

b Go back to previous menu

→ concise title

→ User inputs start address

→ can either be a GPS location or a bus stop number or a zip code.

→ User inputs destination

The "start:" and "end:" text inputs are also menu-like: it suggests locations whilst user is inputting a location.

Once user clicks either menu, this appears:

(I'm starting from... / I'm going to...)	
	Your Location (GPS) 9
★	CHANGI AIRPORT TERMINAL 3
☆	VIVO CITY
	⋮

User can also input a new location from a text box.

first, your GPS location shows up

then, your "favorite" location shows up

After inputting a location, user has an option of "favoriting" the location for easier next time use.

★ FAVORITE
☆ UNFAVORITE

User selects time of arrival / departure.

User can choose either option by simply clicking the word.

If user chooses arrival

Now button shows up.

automatically fill up current time/date.

Chooiseday/month/year from fixed menu format Year is fixed. prevents possible user errors

only shows time period from current. [Can't show past time that is gone up if date is current date]

If incorrect date, register an error in red. → user cannot continue

System registers user's inputs and displays suggested routes.

E.g user chose leave now (for illustration purposes)

confirm user inputs

scroll bar if ≥ 1 route

Map

Bus stop to take 179 from

User location system has detected you are close to defined bus stop.

if bus 179 leaves the bus stop, as detected by GPS, a pop up shows

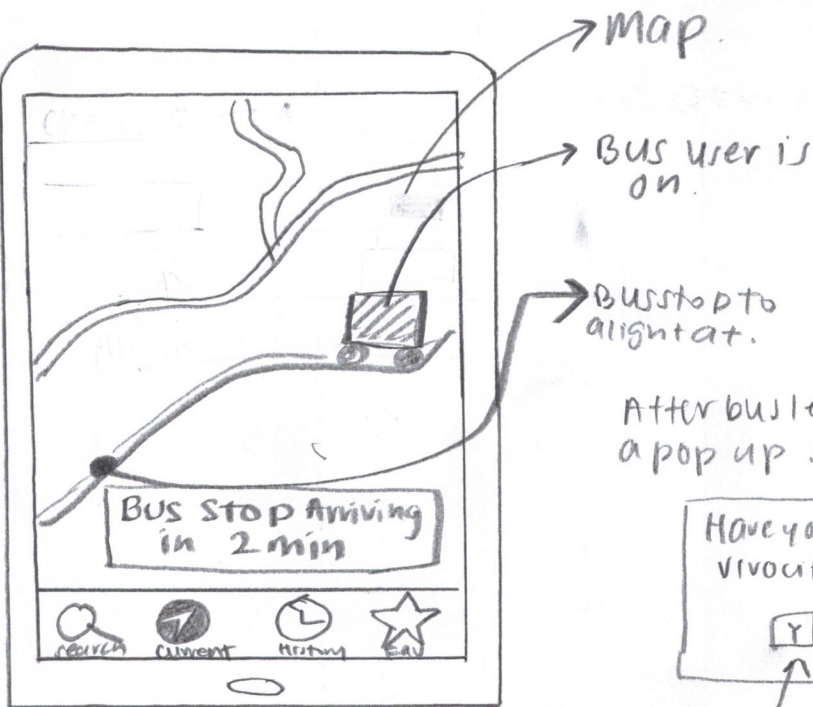

User choose Route A.

choose 1 option to sort routes

real time update

shows full screen If no, system suggests another bus

If yes, go to next screen

After bus leaves the bus stop, a pop up shows

Have you alighted at Vivacity Road Bus stop?

☐ Y ☐ N

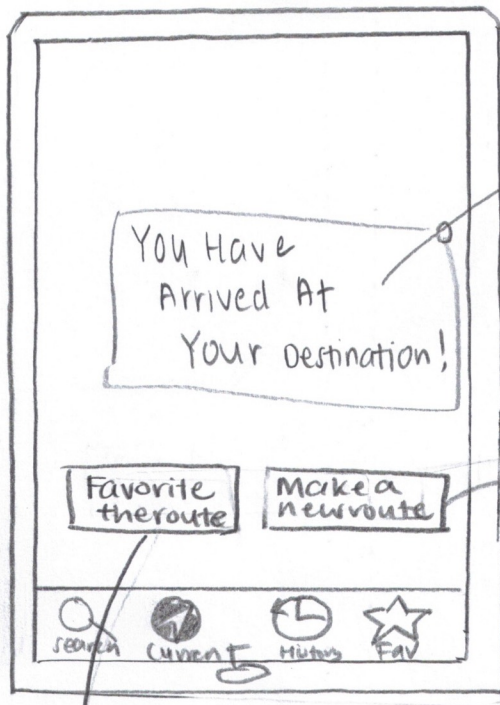

If yes

If No
→ System suggests another route.

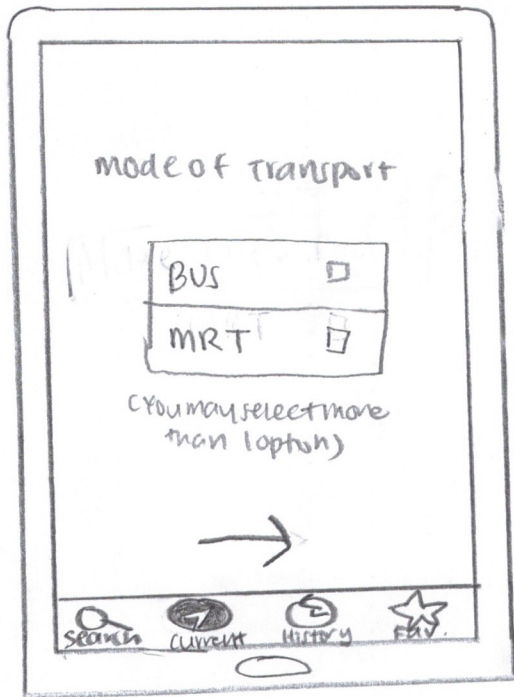

Alert to user to alight the bus now.

Feedback Popup

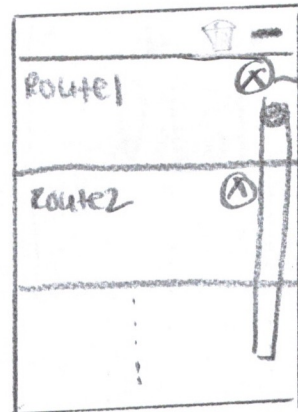

upon clicking this button, the screen changes to (3a)

a quicker way to favorite the just-completed route
